# Clever Digital Choices

**Cyber Safety Course**  
for students aged 10-12

Clever Digital Choices provides teachers with a comprehensive and ready to use resource that incorporates research and strategies developed through 11 years of specialist experience. Internet Safe Training developed this course to assist teachers to facilitate discussions with children to assist them to make clever digital choices to play and learn safely online.

## The Product

Clever Digital Choices includes five lessons designed to empower upper primary aged students to be successful 21st century learners who safely use technology for fun, learning and connection. Students are empowered to make clever digital choices using easy memory aids and fun activities. Teachers are provided with professional development notes to ensure they are confident to facilitate the lessons, regardless of their own digital experience.

**Developed inline with the  
Australian Curriculum and the  
National Principles for Child  
Safe Organisations.**

## Content Developers

Internet Safe Training (IST) parent company, Internet Safe Education (ISE), is a recognised authority in the field of cyber safety education. Founded in 2008 by Brett Lee, ISE has worked with over 1000 schools and understands how children use the online world as a source of fun and learning. They have firsthand experience in how the online world can cause pain and harm when children are not empowered to make *clever digital choices*.

**Clever Digital Choices has been developed in conjunction with school groups and curriculum developers and designers**

## Testimonials

"I really liked how this lesson was explained and set out. We watched a video about how a secret for a friend could turn into a lot more. After, we all named social media apps, online games and websites that you could connect with and/or talk to others...we were given a booklet of questions and stories to answer and figure out what could happen if it was done offline and online. Overall I like the lesson and give it 5 stars"

**CW, Year 6 Student - The River School, Maleny**

"We were fortunate enough to trial the first module of Internet Safe Training for schools. My Year 6 class blew my mind with what they knew about online sites, games and apps, brainstorming things I had never even heard of! I was equally blown away by how naive they were in their understanding of online safety and so this program is one that I am definitely going to follow through with."

**Kerrie Kirwan, Year 6 Teacher - The River School, Maleny**
